Scaling Program

Scaling refers to Blueberry Funded's ongoing simulated capital increase program, in which an earning account's simulated capital allocation is gradually increased based on their performance and adherence to risk management rules.

Simulated capital increments on the Blueberry Funded Account can occur every 3 months on eligible earning accounts.

To qualify for a capital increase, the earning account must generate at least 10% net profit over 3 consecutive months. Additionally, the earning account must process at least 4 payouts within the 3-month period

Scaling Plan Overview

- Upgraded Profit Split of up to 90%
- Balance Scale up of 25% every 3 months
- Ongoing Increases every 3 months if objectives are met
- Trading Objectives and Restrictions remain the same as your original Evaluation Outline on an increased simulated balance
- Maximum Simulated Capital Allocation per trader of \$2 million

Additional Notes:

- All Access Fees published in this Trading Evaluation Outline and Fees are exclusive of relevant taxes or other statutory or regulatory charges. You are responsible for paying any such amounts and the Company may withhold or recover such amounts from you in accordance with clause 14.
- The Company may decide to transition your account post-reward to Blueberry's brokerage in the event that your trading data does not meet our internal requirements.
- Active Trading Day refers to any single calendar day in which closed trades resulting in over 0.5% of initial balance in notional profit is accrued on a trading account.
- Hedging Between Accounts Definition: Using 2 different trading accounts to open opposing trades on the same instruments with the same lot size at the same time.
- Rules for withdrawals: The first withdrawal can only be requested after 14 days of being an earning account funded trader.
- No and Yes: No means that the feature is not allowed under any circumstances. Yes, means that the feature is allowed, subject to certain conditions.

- Prohibited Trading Practices in the Earning Account Stage:
 1. Tick Scalping
 2. High-Frequency trading
 3. Latency Arbitrage
 4. Account Management
 5. Reverse Arbitrage
 6. Martingale Trading
 7. Grid Trading
 8. Data Feed Manipulation
 9. Use of Delayed Data Feed.

- For Synthetic accounts only, during the funded stage, clients must maintain open positions for a minimum duration of 5 minutes in order for the positions to be considered valid.

- Prohibited Gambling Trading Practices in the Earning Account and Evaluation Stages (Not applicable to Stock or Prime Challenge or challenges purchased on and after 12th March 2026)
 1. Overleveraging by trading over permitted fixed trade size limits in our FAQ
 2. Overexposure
 3. Martingale Trading
 4. Stacking Trades
 5. One-sided Bets
 6. Hyperactive Trading
 7. Chasing Losses and entering the opposite direction of a losing trade on the same symbol within a short time frame of closing the losing position

- **Definition of Gambling Behaviour:** "Gambling" refers to actions that violate this policy as per the above list of trading strategies. Traders are expected to maintain a disciplined and well-calculated approach, avoiding excessively risky behaviours. All updated binding information of Gambling behaviour is as per our FAQs at help.blueberryfunded.com
- **Grid Trading Definition:** Grid trading in CFD (Contract for Difference) forex trading is a systematic trading strategy that involves placing a series of buy and sell orders at predetermined intervals (or "grid" levels) above and below a set price level.
- **Assessment Structure:** The Assessment Program may comprise 1, 2, or 3 stages, or alternatively, an Instant Funding Program.
 - For **Instant Funding Programs**, you will be granted access to a funded account immediately upon purchase. However, continued access and eligibility for profit withdrawals are subject to your adherence to the stated Trading Objectives and Risk Parameters. Breach of these terms may result in account termination or forfeiture of profits.

- For **multi-stage Evaluations**:

1. If the Assessment Program comprises **1 stage**, you must meet the Assessment Criteria within the stated Assessment Period to pass the Evaluation.
2. If the Assessment Program comprises **2 stages**, you must meet the requirements of Stage 1 to be eligible to proceed to Stage 2. You must then meet the Stage 2 requirements to complete the Evaluation.
3. If the Assessment Program comprises **3 stages**, you must sequentially meet the requirements of Stage 1 and Stage 2 to be eligible to proceed to Stage 3. You must then meet the Stage 3 requirements to satisfy the Evaluation Criteria.

Each stage, including Instant Funding, is governed by specific rules and requirements outlined at the time of purchase.

- **Definition of Balance Protection Cap:** In our Rapid Evaluations, the Balance Protector is activated once you achieve a 4% profit and the trailing drawdown locks in at breakeven. This feature includes a 1% safeguard to ensure that you do not withdraw your entire allowed drawdown and potentially breach the account.

- **Definition of Inactive Trading Day:** An "Inactive Trading Day" refers to any calendar day during which no new trades are opened and no existing trades are closed in a trader's account. This includes days when a trader might log in to review the market or monitor open positions but does not execute any trading activity, such as opening, closing, or modifying trades. Inactive Trading Days are used to assess a trader's consistency and engagement with their trading account and may be subject to specific terms under activity requirements in our trading agreements.
- **Definition of High Impact News Event:** A high impact news event, often highlighted in red on industry economic calendars, refers to scheduled economic data releases, central bank announcements, or political events that are expected to have a substantial effect on financial markets.
- **Definition of High Impact News Trading:** The opening or closing of any positions within 2 minutes before or after a high impact news event.
- **Definition of Daily Drawdown:** The Daily Equity Loss Threshold indicates the maximum amount of equity that can be lost within a single trading day without exceeding the account's allowable limit. This threshold is a predetermined percentage of the daily starting equity. For specific calculations of all drawdowns that relate to this outline, please refer to our FAQ at help.blueberryfunded.com
- **Definition of Consistency Rule:** At the time of submitting a withdrawal request, no more than 30% of the profit balance in the account should be derived from closed trades or equity movement from a single trading day. In the event that the consistency rule has been breached, the withdrawal will be rejected and can be processed once no trading day accounts for 30% more of the overall profit on the account. Excessive breaches of this rule may result in the account being hard breached or reset to phase 1.

- **Definition of Consistency Rule (Instant Lite):** For Instant Lite, at the time a payout is requested, no single trading day may account for more than 15% of the profit being withdrawn. A failed check defers the request — the trader keeps trading until additional days spread the profit — nothing is ever confiscated. This 15% threshold applies to Instant Lite only. Not every product carries a consistency rule: the 30% threshold above applies only where that product's table marks Consistency Rule as "Yes" (currently Synthetic 2 Step Evaluation, Funded Trader - Earning Account Stage); other products either have no consistency rule or, like 1 Step Flex Challenge and Instant Elite, explicitly mark it "No".
- **Definition of Max Loss per Trade Idea:** You cannot have more than 1.5% of your account's initial balance in unrealized loss on any single trade idea at any point in your funded account. A trade idea is any position, or group of positions, that reflects the same underlying directional view on the market.
- **Definition of Max Risk per Trade Idea (1 Step Flex Challenge):** You cannot have more than 1% of your account's initial balance in unrealized loss on any single instrument, at any point during Stage 1 or the Funded Trader - Earning Account Stage. This rule is assessed per individual instrument, not combined across the pre-defined instrument clusters used elsewhere in this document. This limit is not conditional on reaching any profit threshold — it applies from the start. The first breach of this limit in an evaluation or funded account is a Soft Breach: the offending trade is closed. A second breach results in a Hard Breach of the account.
- **Definition of Concentration Rule (1 Step Flex Challenge):** This rule applies during Stage 1 only, and is assessed at the time the account is upgraded to the Funded Trader - Earning Account Stage. No single trade idea (as defined above) may account for more than 60% of the profit balance used to pass Stage 1. If this threshold is exceeded, the upgrade is deferred — never reduced or confiscated — until additional profitable trading days dilute the concentration below the threshold.

- There is no Concentration Rule on the Funded Trader - Earning Account Stage itself. Although that stage has no Minimum Active Trading Days requirement, a trader whose Stage 1 Concentration Rule check fails will in practice need additional trading days to dilute their concentration before they can be upgraded to it.
- **Definition of News Trading Consequences (1 Step Flex Challenge):** High Impact News Trading is not permitted on 1 Step Flex Challenge. Each violation is logged as a strike. On the 1st strike, a profit deduction is applied. On the 2nd strike, the account's profit split is reduced from 85% to 60%.
- **Definition of Minimum Payout (1 Step Flex Challenge):** Each payout request on the Funded Trader - Earning Account Stage must be for at least 1% of the account's initial balance.
- **Risk Limit Adjustment:** We reserve the right to impose one or more of the following on any funded trader if, in our sole discretion, the trader's strategy or trading activity does not align with the firm's risk strategy and profiling: a maximum position risk limit of up to 1% of the account equity, the 30% Consistency Rule (see Definition of Consistency Rule above), and/or an increased Minimum Active Trading Days requirement. This measure is intended to ensure the sustainability of trading operations and the protection of the firm's capital. Traders subject to such an adjustment will be notified in advance via email from our Risk or Support team.
- **Pre-defined instrument clusters:** The following instrument groups are treated as a single trade idea. Combined unrealized losses across any instruments in the same cluster count toward one 1.5% limit:

1. **FX Majors**
2. **Precious Metals:** XAUUSD and XAGUSD
3. **US Indices:** US30, SP500, NAS100
4. **Crypto:** BTCUSD and ETHUSD

Same Trade Idea : If a new position in the same direction is opened within 10 minutes of closing a losing trade, it will be treated as a continuation of the original trade idea and cannot exceed the maximum Risk Per Trade Idea limit.

- **Definition of Consistency Rule (Synthetic Challenges):** For the Synthetic 1 Step Challenge, Synthetic 2 Step Challenge and Synthetic Instant Funding, at the time of submitting a withdrawal request on the Funded Trader - Earning Account Stage, no more than 25% of the profit balance in the account should be derived from closed trades or equity movement from a single trading day. If this threshold is exceeded, the withdrawal request will be deferred and can be processed once no single trading day accounts for more than 25% of the overall profit on the account. The 25% threshold applies only to these Synthetic Challenges and does not replace the 30% and 15% thresholds referred to above for other products.

Acknowledgment of Additional Resources

All terminology, rules, and calculation methods referenced in the Blueberry Funded FAQ and Knowledge Base are considered an integral part of this Outline of Evaluation and Fees. By participating in the evaluation process, traders acknowledge and agree that the details provided in the FAQ and Knowledge Base located at help.blueberryfunded.com are binding and serve to clarify and expand upon the rules and parameters outlined in this document. It is the responsibility of the trader to review these resources to fully understand the evaluation criteria and trading conditions

Residency Acknowledgement & Disclaimer

For the purposes of the Terms and Conditions and this Schedule, Restricted Territories include Cuba, Iran, North Korea, Myanmar, Russia (or the Crimea, Donetsk, or Luhansk regions of Ukraine), Somalia, United States, Australia, and Syria

Residency Acknowledgement

Restricted country passport holders can use our service if they are resident in non-restricted countries and have a proof of resident visa.

Amendments to this Outline

This Schedule may be updated or amended in accordance with clause 3.1 of the Terms. For any updates or changes affecting Access Fees, Evaluation Criteria, Funded Trader Criteria or Potential Trader Payments, you will be given 1 day prior written notice before they apply to you.
